

Lauren Schroeder

Mesa, AZ | (480) 436-9441 | Lbschroeder1122@gmail.com | www.linkedin.com/in/lauren-schroeder-z1122 | <https://github.com/flamberdoodle> | <https://flamberdoodle.itch.io/>

EDUCATION

Hanyang University Study Abroad

Seoul, South Korea

Spring 2025 Semester

- **Major:** Computer Science
- **GPA:** 3.75
- **Relevant Coursework:** Computer Graphics, Principles of Programming Languages

University of Arizona, College of Science

Tucson, Arizona

May 2026

- **Major:** B.A. Computer Science, Minor in Korean | **Magna Cum Laude**
- **GPA:** 3.74
- **Relevant Coursework:** Software Development, Computer Security, Systems Programming & Unix, Game Dev.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C# (Unity), MATLAB, SQL (SQLite), JavaScript

Frameworks/Tools: Django, React, Unity, Unreal Engine 5, MRTK, Mirror Networking, Git, SQLite, Vector Databases

Graphics/3D: Autodesk Maya, OpenGL, Adobe Creative Suite (Illustrator, After Effects, etc.)

Operating Systems: Windows, Linux, Bash/Unix

PROJECTS

AI Companion for Dementia Patients Web Application

- Engineered a RAG-based LLM pipeline using Groq API, SQLite retrieval, vector embeddings, and Django/React to generate adaptive dementia-care question workflows, evaluate patient responses, and dynamically re-prompt users using research-backed AI evaluation methods

Mixed Reality Nurse Training Simulation

- Implemented multiplayer VR interaction systems in Unity using C#, MRTK, Mirror Networking, and HoloLens 2 for collaborative nurse-training simulations

Unreal Engine Narrative System

- Architected modular gameplay dialogue and interaction systems in Unreal Engine 5 using Blueprint scripting and UI workflows

3D Chess Environment

- Modeled and textured a complete 3D chess scene in Autodesk Maya using polygonal modeling, UV mapping, lighting, and rendering techniques

PROFESSIONAL & LEADERSHIP EXPERIENCE

University of Arizona CDH Research Lab

Tucson, Arizona

Student Researcher

September 2025 – May 2026

- Collaborated with other developers and professors to construct technological innovations, specifically in a VR application for a nurse training simulation
- Troubleshoot connectivity issues and expand multi-player mixed-reality tools

Software Data Sciences

Mesa, Arizona

Software Engineering Intern – VR Interaction Systems

July 2025 – September 2025

- Developed VR applications using Unity and C# scripting to enhance interactivity and immersion
- Applied structured log-based debugging to resolve complex issues efficiently
- Learned and executed tasks independently and collaboratively, adapting quickly to new tools and workflows

Michael's

Tucson, Arizona

Cashier

October 2021 – August 2025

- Provided customer support in fast-paced retail environments while adapting to multiple operational roles

CERTIFICATIONS & ACTIVITIES

Languages: Conversational Proficiency in Korean

Awards: UA Deans list (4 Semesters), Eller Healthcare Poster Showcase Award

Activities: Competitive Club Soccer – 8 years; parallel completion of an A.A.S. in Animation at Pima CC with a B.A. in Computer Science at the University of Arizona
